

# William Kim HACH

## Full Stack Developer

07.83.16.19.89 | hach.william89@outlook.fr | Colmar, France | linkedin.com/in/william-hach-31117b407 | github.com/hachwilliam89-spec | portfolio-kim.vercel

### PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 6 years of operational leadership, combining a background in Economics (Université Paris 1) with hands-on software engineering experience. Built production-grade platforms featuring orchestrated AI agents, CRM integrations, and real-time multiplayer systems. Business-minded, team-oriented, and focused on delivering measurable impact — from 104-test suites to fire-and-forget Odoo synchronization.

### TECHNICAL SKILLS

**Languages & Frameworks:** TypeScript, JavaScript, Next.js, React, Node.js, NestJS, Spring Boot, Java, PHP  
**Databases & ORM:** PostgreSQL, MySQL, MariaDB, Prisma, Drizzle ORM, Zod  
**AI & Integrations:** OpenAI, Anthropic, n8n, Odoo (XML-RPC), Nextcloud (WebDAV), Brevo API  
**DevOps & Tooling:** Docker, Git, Vitest, Swagger / OpenAPI, Scrum / Jira, Leaflet, WebSocket

### PROJECTS

**XIP Telecom v2** | Full Stack Developer 2025 – 2026

Next.js · TypeScript · Drizzle ORM · OpenAI / Anthropic · Odoo · n8n · Docker · Vitest

- Architected an orchestrated AI agent layer (Supervisor/Router, SDR, Business Developer) with an abstract LLMPProvider supporting OpenAI, Anthropic, and
- Integrated Odoo CRM via XML-RPC in a fire-and-forget pattern — syncing prospects, contacts, opportunities, and PDF attachments automatically
- Built an automated telecom audit PDF engine (React PDF + Nextcloud WebDAV) and a manual OpenAPI spec with Swagger UI
- Delivered 104 unit tests (Vitest) in a 4-developer agile team (Jira, GitLab); authored full technical documentation for AI agents and Odoo integration

**RecycleDashboard** | Full Stack Developer & Scrum Master 2025

Next.js · TypeScript · PostgreSQL · Docker · Leaflet · OSRM · VRPTW

- Designed and implemented the VRPTW Evaluation Procedure — a 3-case decision tree (on-time / late / uncertain) to assess tour delays in real time
- Built a drag-and-drop Kanban interface for rescheduling canceled tours across 3 modes (individual client, full tour, full day)
- Led sprint ceremonies as Scrum Master; migrated database from Supabase to local Docker PostgreSQL and documented 15 REST API routes via Swagger

**KCD Formes** | Full Stack Developer (Solo) 2025

Next.js · Spring Boot · Java · WebSocket/STOMP · Docker · MariaDB

- Independently designed and shipped a medieval pixel art tower defense game with an asymmetric real-time multiplayer mode (attacker vs. defender via Web
- Applied Factory Method pattern for entity creation; computed HP, damage, and range from geometric properties of shapes
- Deployed to university servers via a custom Docker Compose pipeline

**Evaluation RH** | Backend Developer 2025

React · NestJS · PostgreSQL · Prisma ORM · Docker · Swagger

- Contributed to a production-grade multi-company HR evaluation system under strict code review (typed DTOs, REST endpoints, dependency injection, Sw

**COS Strasbourg** | Full Stack Developer 2025

Next.js · Prisma · Docker · Tailwind CSS

- Delivered an in-browser DOCX annotation system (Mammoth.js) for a real client — no external plugins required
- Integrated automated email notifications via Brevo API for key workflow events (document upload, validation, annotation)

### WORK EXPERIENCE

**Logistics Manager** | Holding Paul Libbra — Cuisine & Meubles Division 6 years

- Managed warehouse operations and led a team — developed leadership, planning, and cross-functional communication skills
- Optimized supply chain workflows under cost and time constraints, directly transferable to sprint delivery and technical problem-solving
- Business acumen reinforced by a Bachelor's degree in Economics (Université Paris 1 Panthéon-Sorbonne)

### EDUCATION

**Professional Bachelor's Degree in Full Stack Development** 2025 – 2026

UHA 4.0 — Mulhouse, France

**Bachelor's Degree in Economics**

Université Paris 1 Panthéon-Sorbonne, France
